## OVERVIEW

I am a skilled developer with a strong foundation in programming since 2022. Since 2023, I have specialized in Django, focusing on creating efficient and complex backend. I excel in developing RESTful APIs and integrating databases, always striving to deliver high-performance backend solutions. You can see a link to my projects on my github page. I am open to job offers

## EXPERIENCE

### Freelance

01/2024 - Current    Developing websites and telegram bots by order

- Since January 2024, creating websites and Telegram bots based on orders.
